

# **UdaPeople**

## **leap to Continuous Delivery**

# What is Continuous Delivery?

- Reach the market faster than ever through automated CICD pipelines!
- Deliver only ensured quality product!
- Boost revenue, protect revenue, control and reduce costs!

# How CI/CD will Boost Revenue!

- New value-generating features released more quickly through automated faster and more frequent Production Deployments.
- Less time to market through deployment to Production without manual checks.

# How CI/CD will Protect Revenue!

- Reduce downtime from a deploy-related crash or major bug through automated Smoke Tests.
- Quick undo to return production to working state through Automated Rollback Triggered by Job Failure.

# How CI/CD will Control and Reduce Costs!

- Less developer time on issues from new developer code through catching Compile Errors After Merge.
- Less infrastructure costs from unused resources through Automate Infrastructure Cleanup.
